SUMMARY

I aim to build **scalable, secure, and high-performance software systems by combining strong full-stack engineering** with modern frameworks and cloud platforms to solve real-world problems. I envision evolving as an engineer who consistently delivers reliable end-to-end products while driving innovation through intelligent automation, data-driven insights, and thoughtful system design.

As an **AI-first practitioner, I utilize an AI-driven development flow with GitHub Copilot, where autonomous agents plan, generate, test, and refine code across tasks.** This approach accelerates delivery through context-aware automation paired with human-in-the-loop control.

Beyond engineering, I am a **co-founder** of Cadance Run Club, a freelancer and web developer, a musician, a marathon runner, a Formula 1 enthusiast, and a squash player.

- **4+ years of industry experience**
- **Full-stack developer -** JavaScript, React JS, Node JS, MYSQL, Linux, Python – FastAPI.
- **GitHub Copilot agentic workflow**
- **Devops & PromptOps**
- **Fluent in:** English & Hindi
- **Basic knowledge:** French & German

EMPLOYMENTS

Sigmoid Analytics **Jul 2025 - Present**

Software Development Engineer II - Full Stack

- Engineered high-performance, secure workflows by integrating Node.js, FastAPI and React.js microservices architecture, streamlining data processing.
- Develop, maintain scalable data pipelines and analytics solutions with Next.js, TypeScript, and an AI recommendation engine, delivering personalized insights that increased user engagement.

Comviva Technologies **Jan 2022 - Jul 2025**

Senior Software Engineer

Developed scalable APIs and USSD value-added services for mobile banking systems, aligning with streamlined SDLC practices.

- Implemented web features for the LEAP product with Node.js and React.js, delivering a consistent UI built with HTML and CSS.
- Analysed time-series data from InfluxDB and built KPI dashboards in Grafana, enabling data-driven decisions.

Ckuens Analytics **Jul 2021 - Sep 2021**

Data Science Intern

Engineered machine learning models using Python to classify and predict heartbeat signal anomalies with rigorous testing and validation.

- Processed and analysed datasets with NumPy, Pandas, and Matplotlib, presented key findings to senior mgmt.., helped decision-making on tech selection.

PROJECTS

DataGuard DQ (*Sigmoid*) **Sep 2025 – Present**

- Developed secure, high-concurrency APIs using FastAPI and Node.js, facilitating seamless data exchange between internal services and cutting response latency and reducing the time required for audits by ~30% and improving data governance.

LEAP Studio Platform Feature Improvement (*Comviva Technologies*) **Jan 2024 - Jul 2025**

Developed and deployed features from inception to testing, elevating Leap to an enterprise-level tool using React, Express, and Node.js improving customer efficiency by 25%.

Airtel Money (*Comviva Technologies)* **Aug 2024 - Jul 2025**

Designed and implemented a user-friendly interface to manage merchants and subscribers and ensured secure and interference-free monetary transactions for users across 14 countries.

Hotel Bookings Management Application | Visit **Aug 2024 - Sep 2024**

- Developed an Airbnb-inspired user interactive web application on Vercel, utilizing TypeScript and Next.js for a seamless user experience. Utilized Git for version control throughout the project, with the repository publicly accessible.

Cadance Run Club - Web App | Visit **Jun 2025 – Present (*Freelance*)**

- Developed a responsive and community-centric website for Cadance Run Club, aimed at streamlining event coordination and runner engagement. The platform includes robust backend features for event scheduling, participant registration, and a full PhonePe payment gateway integration to ensure secure and hassle-free transactions.

SKILLS

Frontend Development: HTML, CSS, React.js, Next.js

Backend & Frameworks: Node.js, Express.js, Authentication, Microservices

Programming Languages: JavaScript, TypeScript,

Databases: SQL, Redis, MongoDB, PostGresQL, Supabase

Hobbies: Event Management, Brand Management, Running

Tools & Technologies: Linux, Git Versioning, Grafana, Microsoft Office, Data Structures and Algorithms, Figma, AWS, Vercel, Azure AD

EDUCATION

SRM Institute of Science and Technology **Jun 2018 - May 2022**

Bachelor of Technology, Electronics and Communication Engineering : GPA: 8.53 / 10.0

ACHIEVEMENTS

- ***Freelance Web Apps***: Developed web applications and SPA's, similar to the Cadance Run Club platform for multiple clients, delivering tailored solutions that enhanced community engagement and received positive feedback.
- **Comviva Hackathon:** Runner up for developing a demo chatbot for Leap. Users could interact with the bot to get tips, data samples, and screenshots, enabling an understanding of how to navigate and utilize the tool effectively.
- **Event Management:** spearheading over 35 successful community events under Cadance Run Club, fostering local engagement and participation. Additionally, coordinated two high-impact technical events during SRM Aarush ’19 and ’20, driving innovation and hands-on learning among attendees.
