SUMMARY

Full-stack engineer with 5 years of experience building scalable, secure, high-performance software for enterprise and global pharmaceutical clients. AI-first practitioner using agentic development flows with GitHub Copilot and Claude to accelerate delivery through context-aware automation with human-in-the-loop control. Co-founder of Cadance Run Club; freelance web developer, musician, marathon runner, Formula 1 enthusiast and squash player.

SKILLS

Languages & Frameworks: JavaScript, TypeScript, React.js, Next.js, Node.js, Express, Python (FastAPI)
Data & Cloud: PostgreSQL, MySQL, AWS (Textract, Bedrock), InfluxDB, Grafana, Linux
Practices: Full-stack development, DevOps & PromptOps, Claude agentic workflow
Languages (spoken): English, Hindi (fluent); French, German (basic)

EXPERIENCE

UsefulBI Corporation | Jun 2026 - Present
Senior Software Engineer I

- Developing responsive, enterprise-grade applications for global pharmaceutical clients in study report management and materials and drug-testing record management.
- Led UX development and full-stack feature builds across two enterprise products, delivering responsive interfaces and end-to-end features with React.js, Node.js and Python (FastAPI).
- Built document data-extraction pipelines using Amazon Textract and AWS Bedrock and developed an AI chatbot to query and surface insights from pharmaceutical study documents.
- Currently building a start-up agent that automates the pharmaceutical study lifecycle, from study setup through to reporting.

Sigmoid Analytics | Jul 2025 - May 2026
Software Development Engineer II, Full Stack

- Engineered high-performance, secure workflows integrating Node.js, Python (Fast API), React.js and PostgreSQL to streamline data processing.
- Developed and maintain scalable data pipelines and analytics solutions with Next.js, TypeScript and an AI recommendation engine, delivering personalised insights that increased user engagement.

Comviva Technologies | Jan 2022 - Jul 2025
Senior Software Engineer

- Developed scalable APIs and USSD value-added services for mobile banking systems, aligned with streamlined SDLC practices and full ownership of individual features.
- Implemented web features for the LEAP product with Node.js and React.js, delivering a consistent UI built with HTML and CSS.
- Analysed time-series data from Influx DB and built KPI dashboards in Grafana, enabling data-driven decisions.

Ckuens Analytics | Jul 2021 - Sep 2021
Data Science Intern

- Built Python machine-learning models to classify heartbeat-signal anomalies, and analysed datasets with NumPy, Pandas and Matplotlib to guide technology-selection decisions.

PROJECTS

RegXP (UsefulBI) | Jun 2026 - Present

- Owned UX and full-stack development for RegXP, integrating Amazon Textract and AWS Bedrock extraction pipelines and an AI chatbot to surface insights from pharmaceutical study documents.

Study Lifecycle Platform (UsefulBI) | Sep 2026 - Present

- Building an agentic platform that automates the pharmaceutical study lifecycle end-to-end, from study setup through to reporting, using React.js, Node.js and Python (Fast API).

DataGuard DQ (Sigmoid) | Sep 2025 - May 2026

- Developed secure, high-concurrency APIs (Fast API, PostgreSQL, Node.js) for seamless internal data exchange, cutting latency and reducing audit time by ~30% while improving data governance.

LEAP Studio Platform Feature Improvement (Comviva) | Jan 2022 - Jul 2025

- Developed and deployed features from inception through testing, elevating LEAP to an enterprise-level tool using React, Express and Node.js, improving customer efficiency by 25%.

Airtel Money (Comviva) | Aug 2024 - Jul 2025

- Designed a user-friendly interface to manage merchants and subscribers, enabling secure, interference-free transactions for users across 14 countries.

Cadance Run Club - Web App | Visit | Jun 2025 - Present (Freelance)

- Built a responsive community website for Cadance Run Club with event scheduling, participant registration and full Cashfree payment-gateway integration.

EDUCATION

SRM Institute of Science and Technology
B.Tech, Electronics and Communication Engineering | GPA: 8.53 / 10.0
